

Fund what works. Scale what's proven.

Saaf Sutra's model is built for partnership because no single actor can close India's WASH gap alone. We work with funders who want their capital to move from a single project to a scalable, evidence-backed program with a real path to policy influence.

AI-generated illustration of a WASH setting.

Why partner with Saaf Sutra

Grassroots-tested, not desk-designed, models. Rigorous documentation built for donor and government reporting requirements. A demonstrated pathway from pilot to program to policy. Sustainable O&M design built into every project from day one.

Build India's WASH future together.

Corporate CSR Partners

Fund flagship program units (a temple, a school cluster, a public space initiative) with full transparency and documented impact reporting.

Government & Multilateral Agencies

Co-design and scale models within existing missions (Swachh Bharat Mission, Jal Jeevan Mission, state sanitation programs).

Institutional & Philanthropic Funders

Support applied research, training delivery, and larger multi-year WASH infrastructure projects.

Technology & Industry Partners

Collaborate on WASH-industry linkages and innovation pilots, including Wealth-from-Waste initiatives.

Where your partnership can contribute

Support a temple WASH project, sponsor a school WASH program, support a public-space initiative or co-develop an innovation pilot. Every program combines infrastructure, behaviour change and sustainable upkeep.

Start a conversation

Use the Partner with us or Contact us page on our website to tell us about your organisation, interests and preferred program. Project scope, budgets, timelines and reporting arrangements can then be discussed together.
